HOSTED COMMUNICATIONS

For Senior / Assisted Living Environments

The Comfort and Safety of Residents is the primary concern for anyone who runs or manages an assisted or senior living community. You can improve your residents' quality of life by using a hosted phone system tailored to their needs.

Implementing and managing a **new communications system** at your community may seem like an added burden, but MIX Networks can help. As a proven provider of comprehensive solutions for assisted and senior living communities, we understand the unique needs of your residents and staff. We've successfully delivered specialized service and equipment solutions to many assisted and senior living communities.

Put our **knowledge and experience** to work for you! Let us show you how implementing a phone system from MIX Networks - tailored to the needs of your assisted or senior living community - can create new revenue streams, increase operational efficiencies, improve resident comfort and safety – all WITHOUT any added burden on your staff or administrators.
