

Work the *Way You Want* from *Wherever You Are!*

UCFone is a feature-rich, SIP-based softphone that enables Unified Communications -Voice, SMS, XMPP Messaging, and Video Calling from mobile or desktop devices through WiFi or cellular data networks.

Stay Connected

UCFone allows you to function as if you are in your office even while you are away. Colleagues can easily reach you by dialing your extension.

Stay Private.

Outbound calls display your work number and not your private cell phone number. Keep a "corporate" face to called parties even though you're out of the office.

Communication — Your Way

UCFone allows you to see the real-time status of your team members so you can arrange a video or voice meeting on the fly

UNIFIED COMMUNICATIONS @ WORK

1 Sign in

Contact **MIX Networks** to set up an account and receive the fully integrated UCFone with MIX Networks' Hosted PBX Service for Business.

2 Sync Your Contacts

Sync the contacts from your cell phone with your PBX users. This allows you to view and access any of your contacts right from UCFone. For further ease of use, add contacts to your Favorites list.

3 Get Connected

Tap into your business phone system, right from UCFone's intuitive interface! Use UCFone to check Voicemail, see User Status, view Call History, and initiate Voice and Video Calls.

UCFone is fully integrated with the Hosted PBX Platforms of Certified Partners. Access your organization's Hosted PBX Service and UCFone's enhanced features.
