“Unified Communications at Work”

Big Features – Boutique Service

MIXFone is highly flexible and scalable Hosted PBX service plus a device that can be easily managed anywhere – right from a desktop, laptop, or even a mobile phone. The system can be used to seamlessly unite remote workers or locations and can be deployed with a variety of phones, including Poly, Yealink, or mobile phone software app (“softphone”).

MIXFone includes many features of our Hosted PBX solution, such as Voicemail-To-Email, Hunt Groups, Conference Calling, and more (see the “Hosted PBX Features List” for details). The advantage is the bundling of the telecommunications service (SIP Trunking) with an option of a softphone or desk phone (your choice).

Key Benefits:

- Never a charge for System Updates or New Features
- No Expensive Maintenance Contracts
- Equipment Included & Warrantied for Full Contract Term
- USA-Based 24/7/365 Customer Support
- Ultimate Scalability for Managing Peak Demand/Expansion

Devices include **one** of the following per **MIXFone bundle**:

UCFone
Mobile Application

Poly
VVX-350

Yealink
T4 Series
