## Instant Fax ATA 3001M

---

### Product Details:

#### Instant Fax ATA 3001M

The Instant Fax ATA is a one-line analog fax device that enables reliable faxing to and from a standard fax machine. It uses standard FTP (file transfer protocol) instead of SIP/T.38 to transfer faxes between the fax machine and a hosted fax server - a process that is more resilient to jitter and latency.

---

### Technical Specifications

- 1 x Analog FXS port to connect single fax machine
- 1 x 10/100 Ethernet port to connect to LAN
- 4 x LED to displays status of Power, LAN, Registration and Activity
- Configured for plug-and-play with DHCP. Also has built-in web UI in case static IP address is required.

---
